

DATA DICTIONARY

Table Name	Column Name	Description	Data Type	Key
SystemwideRoute	SystemwideRouteID	Unique identifier for each systemwide route	Text	PK
SystemwideRoute	SystemwideRouteName	Name of the systemwide route	Text	-
BusRoute	BusRouteID	Unique identifier for each bus route	Text	PK
BusRoute	BusRouteName	Name of the bus route	Text	-
TrainRoute	TrainRouteID	Unique identified for each train route	Text	PK
TrainRoute	TrainRouteName	Name of the train route	Text	-
TrainRoute	TrainColorCode	Hex color code associated with the train route	Text	-
Historical Calendar Dim	DateID	Unique identified used to link records to the Calendar table	Date	PK
Historical Calendar Dim	Year	Calendar year of the date	Whole Number	-
Historical Calendar Dim	Quarter	Quarter of the year (Q1-Q4)	Whole Number	-
Historical Calendar Dim	MonthName	Full name of the month	Text	-
Historical Calendar Dim	MonthShortForm	3 letter abbreviation of the month, used for concise reporting & visualizations	Text	-
Historical Calendar Dim	MonthNumber	Numeric representation of the month (1-12)	Whole Number	-
Historical Calendar Dim	WeekNumber	Week number of the year	Whole Number	-
Historical Calendar Dim	Weekday	Name of the day of the week	Text	-
Historical Calendar Dim	WeekdayShortForm	Abbreviated name of the day of the week, used for concise reporting & visualizations	Text	-
Time	HourID	Unique identified for each hour of the day	Whole Number	PK
Time	FormattedHour	Hour of the day	Whole Number	-
Time	AmPm	Indicates whether the hour falls in AM or PM	Text	-
Time	Day Period	Segment of the day the hour falls under (e.g., Morning, Midday, Evening)	Text	-
Historical Alerts Fact	AlertID	Unique identified for each alert record	Whole Number	PK
Historical Alerts Fact	DateID	Links each alert to the Calendar table	Date	FK
Historical Alerts Fact	HourID	Links each alert to the Time table	Whole Number	FK
Historical Alerts Fact	SystemwideRouteID	Links each alert to the SystemwideRoute table	Text	FK
Historical Alerts Fact	TrainRouteID	Links each alert to the TrainRoute table	Text	FK
Historical Alerts Fact	BusRouteID	Links each alert to the BusRoute table	Text	FK
Historical Alerts Fact	RouteStatus	Status of the route at the time of the alert	Text	-
Historical Alerts Fact	Time	Timestamp indicating when the alert occurred	Time	-
Historical Alerts Fact	AlertSeverityRange	Severity level associated with the alert eg 0, 1-19, 20-39	Text	-
Historical Alerts Fact	RouteStatusCategory	Category grouping assigned to the route status	Text	-
Live Alerts Fact (Not the part	RecordID	Unique identifier for each alert record	Whole Number	-
Live Alerts Fact	RecordType	Type of route the record belongs to (bus, train, or systemwide)	Text	-
Live Alerts Fact	RouteID	Identifier of the route associated with the alert	Text	-

Live Alerts Fact	RouteName	Name of the route associated with the alert	Text	-
Live Alerts Fact	RouteStatus	Current status of the route	Text	-
Live Alerts Fact	RouteColorCode	Hex color code associated with each route	Text	-
Live Alerts Fact	FetchedDate	Date indicating when the alert occurred	Date	-
Live Alerts Fact	FetchedTime	Time indicating when the alert occurred	Time	-
Live Alerts Fact	AlertSeverityRange	Severity level associated with the current alert.	Text	-
Live Alerts Fact	RouteStatusCategory	category grouping assined to the route status	Text	-
Calendar Dim	DateID	Unique identified used to link records to the Calendar table	Date	PK
Calendar Dim	Year	Calendar year of the date	Whole Number	-
Calendar Dim	Quarter	Quarter of the year (Q1-Q4)	Whole Number	-
Calendar Dim	MonthName	Full name of the month	Text	-
Calendar Dim	MonthShortForm	3 letter abbreviation of the month, used for concise reporting & visualizations	Text	-
Calendar Dim	MonthNumber	Numeric representation of the month (1-12)	Whole Number	-
Calendar Dim	WeekNumber	Week number of the year	Whole Number	-
Calendar Dim	Weekday	Name of the day of the week	Text	-
Calendar Dim	WeekdayShortForm	Abbrevated name of the day of the week, used for concise reporting & visualizations	Text	-
Persistent Train Alerts	TrainRouteID	Unique identifier used to link records to the train table	Text	PK
Persistent Train Alerts	TrainRouteName	Name of the train route	Text	-
Persistent Train Alerts	Status	Current status of the route at the latest snapshot	Text	-
Persistent Train Alerts	Interpretation	Explanation of how long the status has stayed unchanged	Text	-
Persistent Train Alerts	Match2	Indicates whether the status matched the prior snapshot 2 checks back	Boolean	-
Persistent Train Alerts	Match3	Indicates whether the status matched the prior snapshot 3 checks back	Boolean	-
Persistent Train Alerts	Match4	Indicates whether the status matched the prior snapshot 4 checks back	Boolean	-
Persistent Train Alerts	Match5	Indicates whether the status matched the prior snapshot 5 checks back	Boolean	-
Persistent Train Alerts	SinceSnaphot	Timestamp marking when the current status was recorded	Time	-
Persistent Train Alerts	Duration (min)	Length of time in mins since the current status has remained unchanged	Text	-
Persistent Train Alerts	Persistence Level	Category label based on how long the status is. Chronic or Ongoing	Text	-
Persistent Train Alerts	Duration	Length of time in hours and mins since the current status has remained unchanged	Text	-
Persistent Bus Alerts	BusRouteID	Unique identifier used to link records to the bus table	Text	PK
Persistent Bus Alerts	BusRouteName	Name of the bus route	Text	-
Persistent Bus Alerts	Status	Current status of the route at the latest snapshot	Text	-
Persistent Bus Alerts	Interpretation	Explanation of how long the status has stayed unchanged	Text	-
Persistent Bus Alerts	Match2	Indicates whether the status matched the prior snapshot 2 checks back	Boolean	-
Persistent Bus Alerts	Match3	Indicates whether the status matched the prior snapshot 3 checks back	Boolean	-
Persistent Bus Alerts	Match4	Indicates whether the status matched the prior snapshot 4 checks back	Boolean	-
Persistent Bus Alerts	Match5	Indicates whether the status matched the prior snapshot 5 checks back	Boolean	-

Persistent Bus Alerts	Match5	Indicates whether the status matched the prior snapshot 5 checks back	Boolean	-
Persistent Bus Alerts	SinceSnaphot	Timestamp marking when the current status was recorded	Time	-
Persistent Bus Alerts	Duration (min)	Length of time in mins since the current status has remained unchanged	Text	-
Persistent Bus Alerts	Persistence Level	Category label based on how long the status is. Chronic or Ongoing	Text	-
Persistent Bus Alerts	Duration	Length of time in hours and mins since the current status has remained unchanged	Text	-
Persistent Systemwide Alerts	SystemwideRouteID	Unique identifier used to link records to the systemwide table	Text	PK
Persistent Systemwide Alerts	SystemwideRouteName	Name of the systemwide route	Text	-
Persistent Systemwide Alerts	Status	Current status of the route at the latest snapshot	Text	-
Persistent Systemwide Alerts	Interpretation	Explanation of how long the status has stayed unchanged	Text	-
Persistent Systemwide Alerts	Match2	Indicates whether the status matched the prior snapshot 2 checks back	Boolean	-
Persistent Systemwide Alerts	Match3	Indicates whether the status matched the prior snapshot 3 checks back	Boolean	-
Persistent Systemwide Alerts	Match4	Indicates whether the status matched the prior snapshot 4 checks back	Boolean	-
Persistent Systemwide Alerts	Match5	Indicates whether the status matched the prior snapshot 5 checks back	Boolean	-
Persistent Systemwide Alerts	SinceSnaphot	Timestamp marking when the current status was recorded	Time	-
Persistent Systemwide Alerts	Duration (min)	Length of time in mins since the current status has remained unchanged	Text	-
Persistent Systemwide Alerts	Persistence Level	Category label based on how long the status is. Chronic or Ongoing	Text	-
Persistent Systemwide Alerts	Duration	Length of time in hours and mins since the current status has remained unchanged	Text	-
